- A. Congruent distribution. In the realm of nonparametric
- 2 statistics, the relative differences, or orders, of robust esti-
- $_{\rm 3}$ $\,$ mators are of primary importance. Based on this principle, in
- 4 the absence of contamination, as the parameters of the distri-
- $_{\mbox{\scriptsize 5}}$ bution vary, all reasonable nonparametric location estimates
- $_{6}$ should asymptotically change in the same direction.
